

ORGANISM LIST:

Brook trout
Rosyside dace
River chub
Rosefin shiner
Southern two-lined salamander
Dragonfly larvae
Damselfly larvae
Mayfly larvae
Stonefly larvae
Dobsonfly larvae (hellgrammite)
Water penny
Great blue heron
Appalachian brook crayfish
Northern water snake
Benthic algae
Leaf detritus
Leech
Belted kingfisher
Freshwater amphipod
Asian clam

Brook trout

Scientific name:

What does it eat?

What are its predators?

Interesting fact:

Rosyside dace

Scientific name:

What does it eat?

What are its predators?

Interesting fact:

River chub

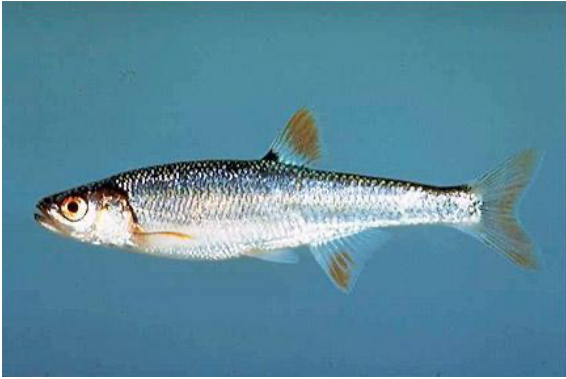

Scientific name:

What does it eat?

What are its predators?

Interesting fact:

Rosefin shiner

Scientific name:

What does it eat?

What are its predators?

Interesting fact:

Southern two-lined salamander

Scientific name:

What does it eat?

What are its predators?

Interesting fact:

Dragonfly larvae

Scientific name:

What does it eat?

What are its predators?

Interesting fact:

Damselfly larvae

Scientific name:

What does it eat?

What are its predators?

Interesting fact:

Mayfly larvae

Scientific name:

What does it eat?

What are its predators?

Interesting fact:

Dobsonfly larvae (hellgrammite)

Scientific name:

What does it eat?

What are its predators?

Interesting fact:

Water-penny beetle larvae

Scientific name:

What does it eat?

What are its predators?

Interesting fact:

Great blue heron

Scientific name:

What does it eat?

What are its predators?

Interesting fact:

Appalachian brook crayfish

Scientific name:

What does it eat?

What are its predators?

Interesting fact:

Northern water snake

Scientific name:

What does it eat?

What are its predators?

Interesting fact:

Benthic algae

What is it?

How does it get its food?

What eats it?

Interesting fact:

Leaf detritus

Scientific name:

What does it eat?

What are its predators?

Interesting fact:

Leech

Scientific name:

What does it eat?

What are its predators?

Interesting fact:

Belted kingfisher

Scientific name:

What does it eat?

What are its predators?

Interesting fact:

Freshwater amphipod

Scientific name:

What does it eat?

What are its predators?

Interesting fact:

Asian clam

Scientific name:

What does it eat?

What are its predators?

Interesting fact:
